```
to spread-cult

    If neighbours-are susceptible?

        Ask neighbours

            [set member? to true]

    end
```

- Continue to write your pseudo-code

- The benefit of pseudo-code is that it gets you thinking in terms of if-then-else and all of the things your agent needs to do

- You can see this is a very different way of thinking about the past, or translating the stories we tell into something *operational.*
